

IWTE COMPANY PROFILE

2024/2025

ABOUT IWTE

International For Water Technology & Environment (IWTE), founded in 1992, is a leader in sustainable water treatment solutions. With 32+ years of industry expertise, IWTE serves various industries across the Middle East and Africa, providing cutting-edge solutions to meet growing water challenges. Headquartered in Giza, Egypt, with additional offices in Saudi Arabia, UAE, and the UK, IWTE designs, manufactures, and supports the installation of water treatment systems that are both cost-effective and environmentally sustainable.

VISION

To become the leading water treatment company in the Middle East and Africa, turning water challenges into sustainable opportunities while attracting top talent and growing into a powerful, unified force for innovation, quality, and environmental responsibility.

MISSION

We deliver the right economical water solutions. Our success depends on providing reliable and sustainable systems that drive the performance and success of the businesses we serve in MEA.

PRODUCTS & SERVICES

Water Treatment Components & Spares

RO membranes, UV systems, chlorine dioxide generators, dosing pumps, control systems, activated carbon, ion exchange resin, & more.

Design & Manufacture RO Plants

Specializing in both Brackish & Sea Water Plants.

Pharma Water Treatment Plants

Customized systems for pharmaceutical applications.

Sewage Water Treatment Plants

Efficient solutions for urban and industrial sewage treatment.

Industrial Wastewater Plants

Systems to manage & treat industrial waste effectively.

Filtration & Softening Systems

Advanced water filtration and softening technologies.

TEAM & EXPERTISE

IWTE's leadership team and employees are recognized for their technical expertise in water engineering, R&D, and project management. With over 400 years of combined experience, IWTE's team offers unparalleled support, from design to after-sales services.

GLOBAL REACH

Key Markets **Egypt** and **Saudi Arabia**

Export Markets: Active presence across the Middle East and Africa with a growing international footprint.

SUSTAINABILITY & INNOVATION

Sustainability Initiatives

IWTE is committed to environmental sustainability by promoting water conservation and integrating green technologies into its water treatment systems. Through innovative designs, IWTE reduces water wastage and energy consumption in both industrial and municipal applications.

Innovation

Partnering with Water Professionals for R&D on filtration products, IWTE constantly pushes the boundaries of water treatment technologies, ensuring that clients receive state-of-the-art filtration solutions.

SUCCESS STORIES

Food & Beverage Project

Installation of advanced UV systems to treat thousands of cubic meters of water per day, ensuring compliance with stringent safety standards.

Pharmaceutical Project

Customized pharma water treatment systems, enabling efficient and safe water use in pharmaceutical production.

WHY CHOOSE IWTE?

Cost Efficiency

Leveraging the Right Economical Solution Pyramid, IWTE offers cost-saving solutions that reduce operational expenses without compromising quality.

Technical Expertise

With decades of experience, IWTE is known for delivering customized solutions that meet client-specific water treatment needs.

Proven Track Record

IWTE has successfully installed over 4,000 systems for 400+ clients, with a commitment to long-term sustainability and technical excellence.
